Biodegradable Compostable

可生物降解．可作堆肥用

It is biodegradable under specific composting environment.

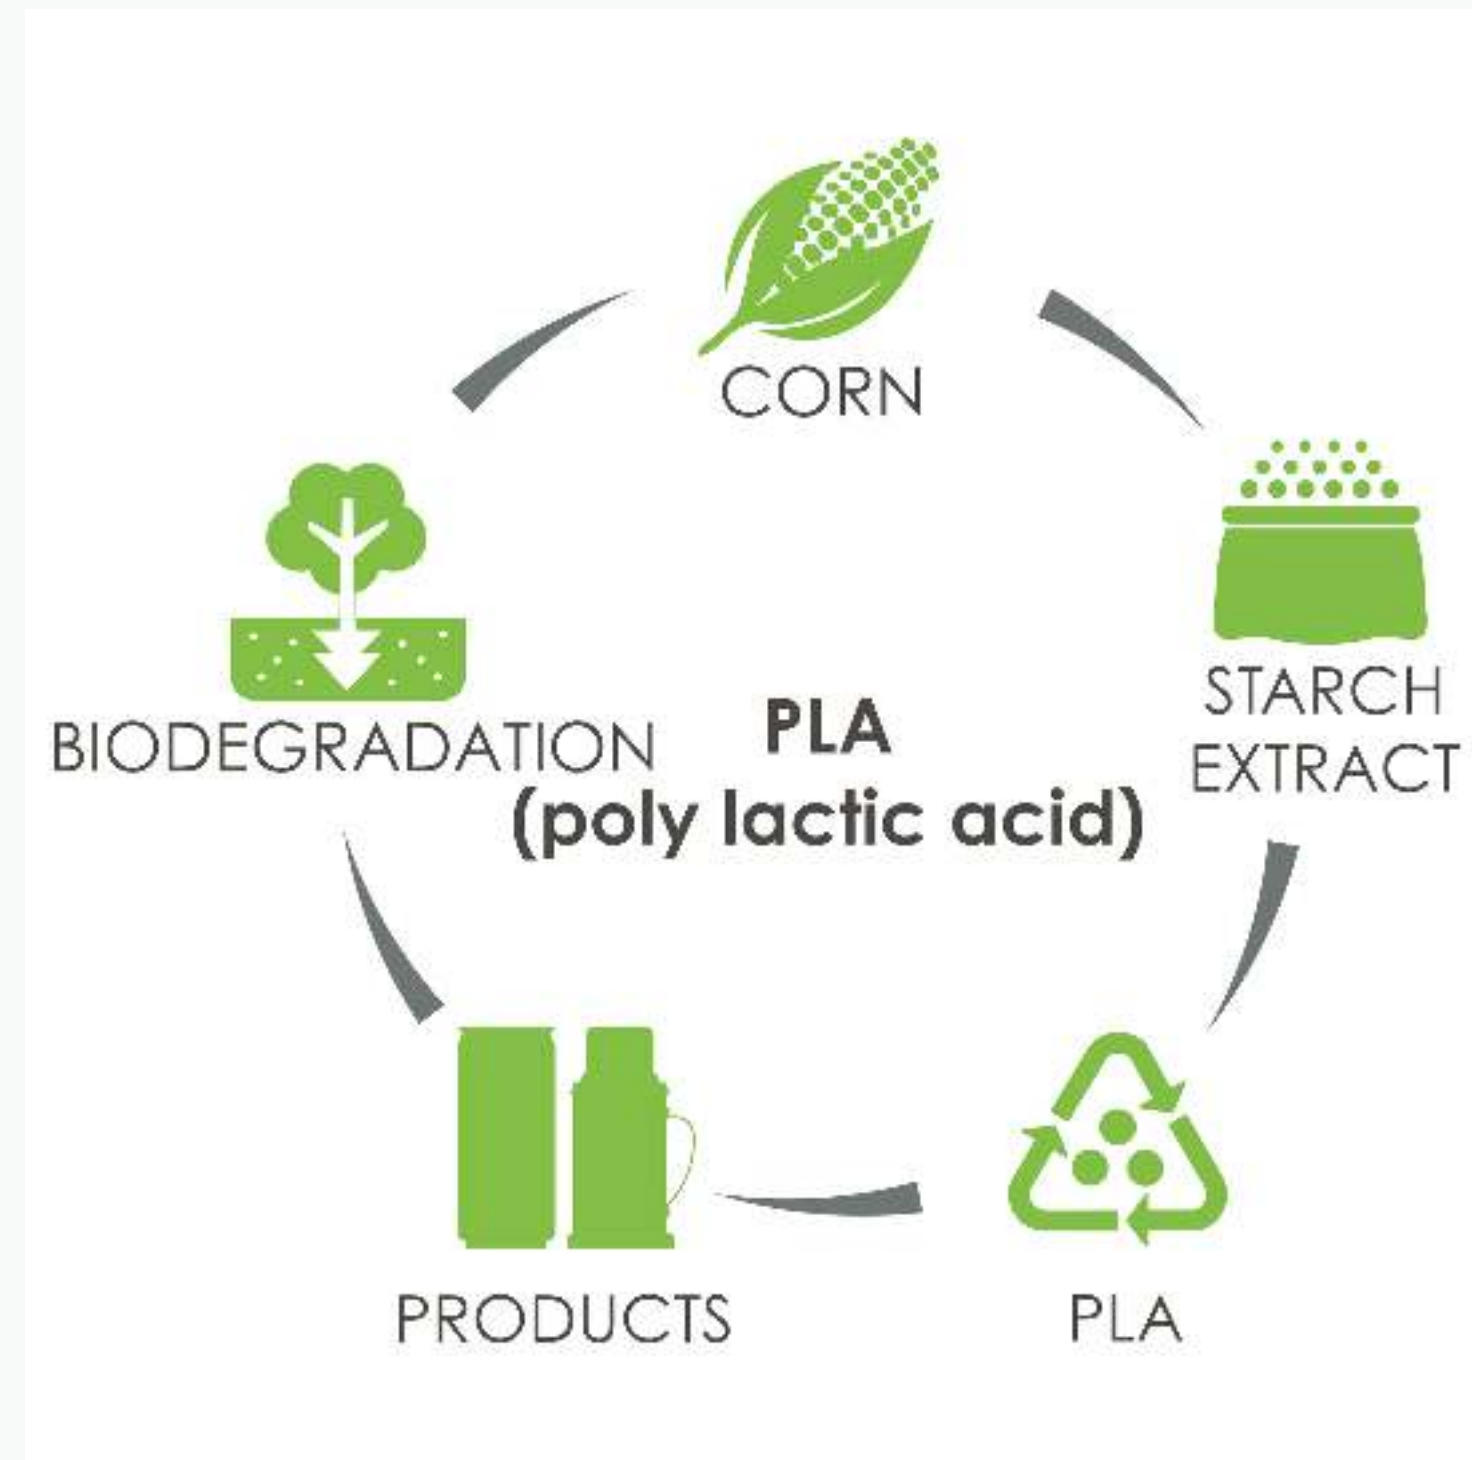

在指定的堆肥環境下，可生物降解

Thanks to the natural properties of the material, it can then become compost which can be used as fertiliser for growing crops or plants.

因為是天然物料，降解後可作堆肥(種植用)

Petroleum-base plastic is NEVER biodegradable nor compostable.

石油基的塑膠 - [永遠不能生物降解和作堆肥用]

Less Carbon Emission 較少排碳量

The mug is ECO starting from the
production of the material.
打從物料生產開始便是環保

60% less carbon emission during production
of PLA (poly lactic acid) compares to that
of petroleum-base plastic.
生產時的排碳量比石油基塑膠，少60%

我們用的是國外進口料

Durable 耐用

Anti-bacterial 抗菌

Material will get weakened after 2 years, i.e. it might crack easier compares to when you first bought it.

It also means we do not cheat you on the material, it is truly plastic-free.
可用約2年，2年後物料會開始弱化，比初買回來
是較脆或較易裂

For hygiene reason, any tableware is advised to be changed after 2 years.
衛生建議，一般餐具應每2年便要更換

Do not dispose mug into the recycling bin. It is no.7 classified.

不要放入[回收桶], PLA屬第7號

Reusable
